

SCOTT DURRIE

MULTIMEDIA DESIGNER

402.871.3013 • Sdurrie@gmail.com • DurrieDesign.com

As a freelance multimedia designer based out of Omaha, NE, I develop commercial websites, online marketing and all forms of traditional marketing materials. I help create videos, TV commercials, signs and set designs. I'm familiar with most animation techniques including 2D/3D motion graphics and basic video game design. I also work extensively with both agencies and individuals allowing

my specialized skill sets to deepen. As a former adjunct instructor I pushed myself to learn current standards being implemented by other professionals so my students were not only well versed, but equipped with real world information. In addition, I've helped create both digital and traditional ad materials translated into five languages and displayed across four continents.
